

## **Technical Reference - Q&A**

**1. Q: When my computer is in standby mode, I can not resume from USB devices. Can you help?**

**A:** This is due to the design of Windows XP system. You may refer to the Microsoft Knowledge Base: <http://support.microsoft.com/kb/841858>

If you want to resume from USB devices, such as USB mouse, remote control, you may directly install the registry file below:

<http://www.asrock.com/support/download/ResumeUSB.ZIP> and then restart your computer.

**2. Q: I would like to use the analog CD-in function in Windows Vista. But the “Analog” item of Playback and Rip can not be selected in Windows Vista. It was gray. Why? (Here is the screenshot.)**

**A:** Windows Vista operating system does not support the analog CD-in. The output of CD/DVD-ROM playback will be digital only

3. Q: I plugged a headphone in my ASRock motherboard with Realtek HD Audio, and set the “Audio I/O” from “2CH” to “Headphone” in Realtek Audio Manager (picture1). But the Realtek Audio Manager always recognized my headphone as 2CH speaker after I restarted the operating system (picture2).

What should I do?

Picture1:

Picture2:

- A:** Please refer to the following steps to set up the Realtek Audio Manager correctly.
1. Please remove all audio I/O (Headphones, Speakers, Microphone...) from the motherboard.
  2. Please go to Realtek Audio Manager and set the “Audio I/O” you want.
  3. Click ok.
  4. Please plug your audio I/O back.
  5. Restart your system.
