

Technical Reference - Q&A

1. Q: My onboard audio is Realtek HD audio. In the Windows Vista, I can't use Sound Recorder to record the audio. What should I do?

A: Please refer to below steps to set the audio device.

1. Install Realtek HD Audio driver from motherboard Support CD.
Or download the Realtek HD audio driver from ASRock website.
<http://www.asrock.com/support/Download.asp>
2. Plug in your recording devices (Microphone or other devices) to the Line-in port (or Microphone port), and then the recording device will show up "Line In" (or "Microphone") icon. Please kindly refer to below image. (Control Panel > Sound > Recording)

*Before plug in the recording devices:

*After plug in the recording devices:

3. Reopen the Sound Recorder to record the audio.

2. Q: If the MIDI/GAME port is enabled in the BIOS setup, the device manager will show yellow “ ! ” under Windows Vista. Why?

A: Microsoft had removed the support for MIDI/GAME port under Windows Vista. Please kindly refer to below Q&A No.4:
